EDUCATION

VNUHCM – University of Science

Bachelor of Information Technology — GPA: 3.52/4.0

Ho Chi Minh City, Vietnam

Sep. 2023 – Aug. 2027

CERTIFICATIONS & AWARDS

ICPC Vietnam Provincial Programming Contest | *Provincial Qualifier*

Oct. 2024

IELTS | *Score: 6.0*

Mar. 2023

EXPERIENCE

Software Engineer Intern

i-stech

Jan. 2026 – Present

Ho Chi Minh City, Vietnam

TTA Analytics Platform Migration

Apr. 2026 – Present

- Spearheaded the migration of the **TTA analytics platform** to AWS, architecting scalable data pipelines to process **2.6 GB** of socioeconomic data across **13 relational datasets**
- Optimized ingestion workflows for files exceeding **28 million rows**, forecasting demographic and economic trends for **1,741 municipalities** and **107 industry sectors** through 2050

PEP Project Management Platform

Jan. 2026 – Present

- Developed **PEP**, a full-stack project management platform using FastAPI, Next.js, Supabase, Stripe, and cloud services
- Architected robust payment workflows integrating **bank transfers and Stripe**, implementing complex refund logic to properly manage customer balance debits and next-invoice adjustments
- Engineered **automated background jobs** to manage the billing lifecycle and bidirectionally synchronize Stripe events with the database, eliminating manual tracking of contract expirations and **saving an estimated 10 hours of manual data entry per week**

PROJECTS

HomeStay Dorm

Team Leader (Team of 4)

Mar. 2026 – Present

GitHub

- **Technologies:** *TypeScript, Next.js, Supabase, VietQR, WebSocket, UML, MVC*
- Engineered a scalable system architecture, drafting **15+ UML diagrams** (Use Case, Sequence, Activity) to translate complex business requirements into modular technical workflows
- Integrated the **VietQR API** to facilitate seamless, automated banking transactions, and engineered bidirectional **WebSocket** connections to instantly synchronize payment statuses and push real-time notifications
- Implemented the foundational backend architecture in **TypeScript** using the **MVC design pattern** and strict **OOP principles**, establishing robust data models for seamless RESTful API communication

Hospital Data Security System

Team Leader (Team of 5)

Feb. 2026 – Present

GitHub

- **Technologies:** *Oracle Database, .NET, Oracle Label Security*
- Architected a secure database environment for hospital administration, implementing **Role-Based Access Control (RBAC)** to manage fine-grained permissions across **10+ distinct user roles**
- Engineered complex SQL scripts to enforce **Oracle Label Security (OLS)** policies, configuring hierarchical data labels and compartments to strictly safeguard sensitive patient records
- Deployed and validated comprehensive user authorization protocols, ensuring absolute data compartmentalization and compliance with enterprise-grade data security standards

TECHNICAL SKILLS

Languages: Python, TypeScript, Java

Frameworks: Angular, Next.js, FastAPI, Spring Boot

Databases: PostgreSQL, Oracle

Tools: Git, Docker, CI/CD, Google Cloud Platform, AWS, Power BI, Jira
